Food & Pharma
Pharma Dispenser in Hygienic Design

Pharmaceutical Design!

Pharma Dispenser in Hygienic Design

- gentle on product
- quick and easy dis-/assembling without tools
- all product contacting parts autoclavable
- hermetically sealed (flushing/barrier chamber)
- optimized internal space
- pulsation free
- all seals in Hygienic Design
- compact design
- valve-free filling
- all surfaces for pharmaceutical applications ($Ra \leq 0.8 \mu m$)
- design following the EHEDG guidelines
- GMP-conform construction/development
- FDA compliant materials
- 3.1 Inspection Certificate (DIN EN 10204)

The perfect component
for a hygienic production!

ViscoTec

Perfectly filled by ViscoTec!

Easy to clean connection at dispenser outlet

- Different dosing connection sizes
- Luer Lock connection for dosing nozzles
- PharmCom process connection DIN 11864-3

About ViscoTec

ViscoTec develops systems for conveying, dosing, filling and discharging medium to high viscosity fluids.

We offer our customers comprehensive consultation to individual application. In case of difficult tasks, we carry out tests in our laboratory in order to achieve the best results for our customers.

ViscoTec Pumpen- u. Dosiertechnik GmbH was established in 1997 and has, over the years, become a premium supplier of industrial dosing technology. Our employees are specialists in the implementation of projects in many industrial sectors around the world.
